

# ZOOLION TECHNOLOGY WITH INGENUITY AND CARE

The world's leading full-process smart mining machinery manufacturing factory

Zoomlion Mining Machinery Company possesses globally leading intelligent production lines featuring smart, environment-friendly and internationalized technologies, covering high-end machinery for the full process of open-pit mining, including "drilling, digging, loading, hauling and crushing". Built with advanced processing and assembly techniques and rigorous quality control, each machine delivered embodies the highest level of quality.

# ZOOLION ELECTRIC DRIVE DUMP TRUCK

ZTE210

ZOOLION

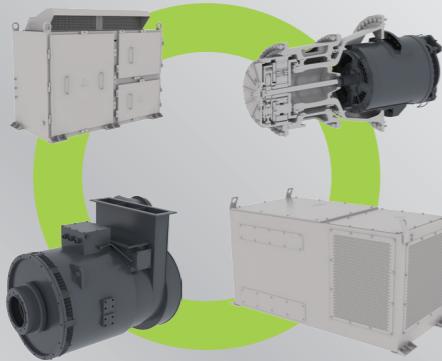

# VISION CREATES FUTURE

## ZTE210

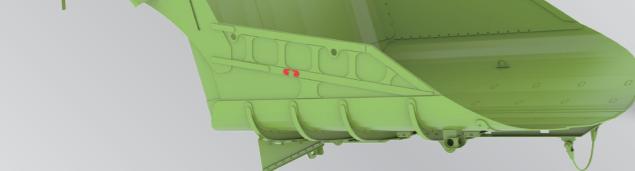

Engine Rated Power: 1045 kW @ 1800 rpm  
Rated Payload: 120000 kg  
Curb Weight: 90000 kg  
Body Capacity: 70 m<sup>3</sup>

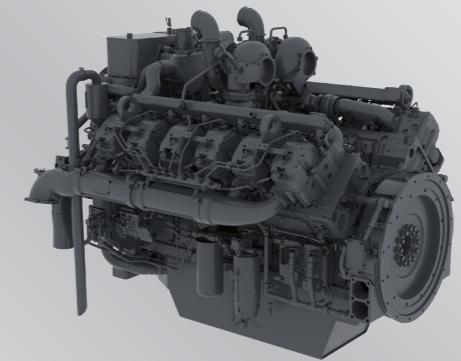

# HIGH EFFICIENCY AND ENERGY SAVING

The globally advanced third-generation AC-DC-AC electric drive system: Standing two generations ahead of mechanical transmission technologies, it delivers 10% greater rimpull than DC-powered vehicles. Paired with advanced driving control strategies, it remarkably improves the operational safety of mining trucks.

It comes standard with a 70 m<sup>3</sup> large-capacity lightweight body; The main body is made of NM450 material and the stiffening plates are made of Q690E material, providing superior durability; Featuring a large-arc transition curve design, it ensures excellent material centering, minimal adhesion, and a 20% increase in dump speed.

The YUCHAI electronically controlled V12 engine delivers robust performance and exceptional reliability. Generating up to 1,450 horsepower, it offers the comprehensively strongest power among mining trucks in the same tonnage, achieving a maximum speed of 51 km/h, together with high climbing speed, and 10% improvement in haulage efficiency.

Hydro-pneumatic suspension: Strong load-bearing capacity, low failure rate, and adaptable to various complex working conditions

# SAFE AND RELIABLE

## Rationally designed safety configurations:

Full-automatic fire extinguishing system with 12 emergency stop buttons positioned across the fire suppression points on the machine

## Two-longitudinal and four-transverse box-shaped welded frame:

The main body is crafted from high-strength alloy steel, with cast steel applied to stress-concentrated areas, ensuring a designed service life exceeding 60,000 hours.

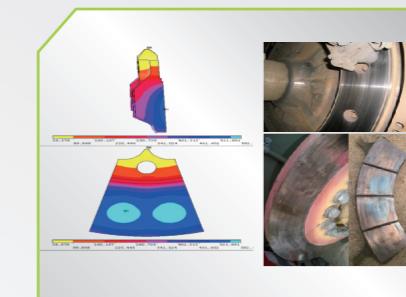

Long-life wheel-rim reducer with strong impact resistance.

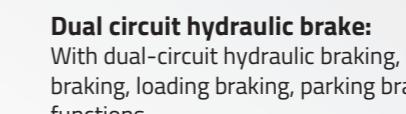

## Cab protection in case of tire blowout:

Featuring a bottom box-shaped structure, it will effectively protect the safety of driver.

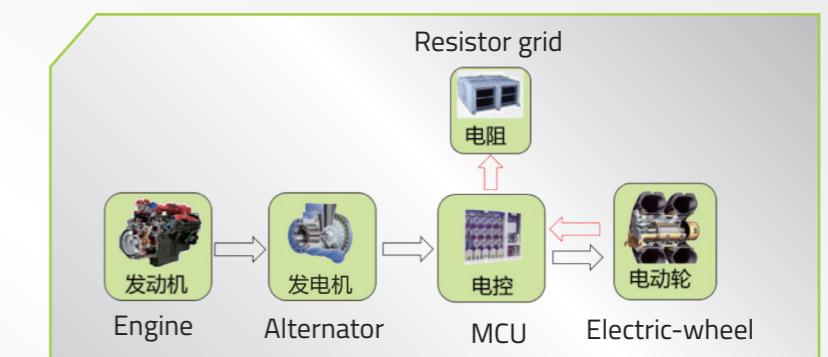

## Hydraulic mechanical braking:

Alloy forged steel discs paired with copper-based powder metallurgy friction pairs ensure a service life of up to 10,000 hours.

## Dual circuit hydraulic brake:

With dual-circuit hydraulic braking, it is equipped with service braking, loading braking, parking braking and emergency braking functions.

## Electric braking:

With a power output of up to 1440 kW without mechanical contact, it ensures high reliability.

# COMFORTABLE CONTROL

**Cab:**  
Integrated ROPS and FOPS structures, with soundproof design on the cab frame interior and bottom, ensuring low noise levels.

Air-cushioned seat with built-in electric pump, significantly reducing road-induced vibrations.

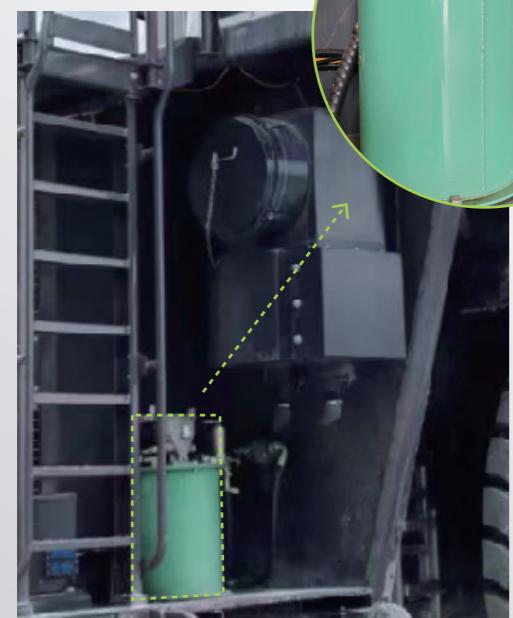

**Ergonomic layout:** Easy to operate.

Pressurization system with effective external dust isolation.

# CONVENIENT MAINTENANCE

Centralized refilling:  
One-stop completion of oil refilling (lubricating  
grease, coolant, hydraulic oil, etc.)

Single-line centralized lubrication system with  
adjustable displacement at the oil lubricator  
outlet.

Convenient walkways:  
One primary boarding ladder and two auxiliary ones,  
accompanied by a generously spacious platform.

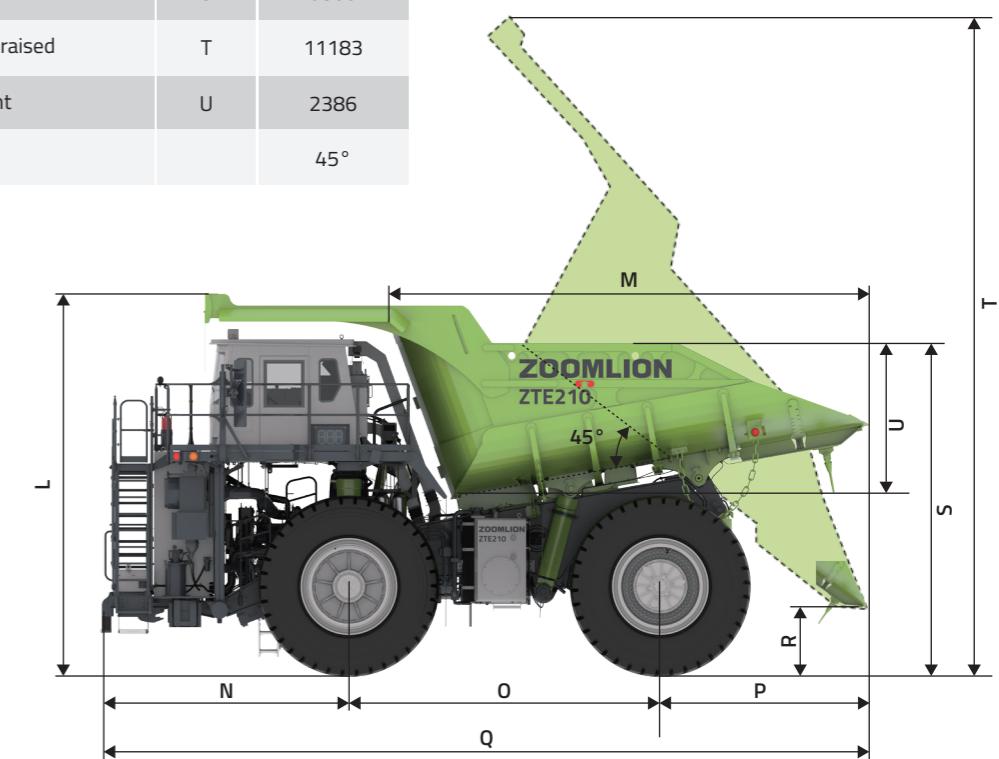

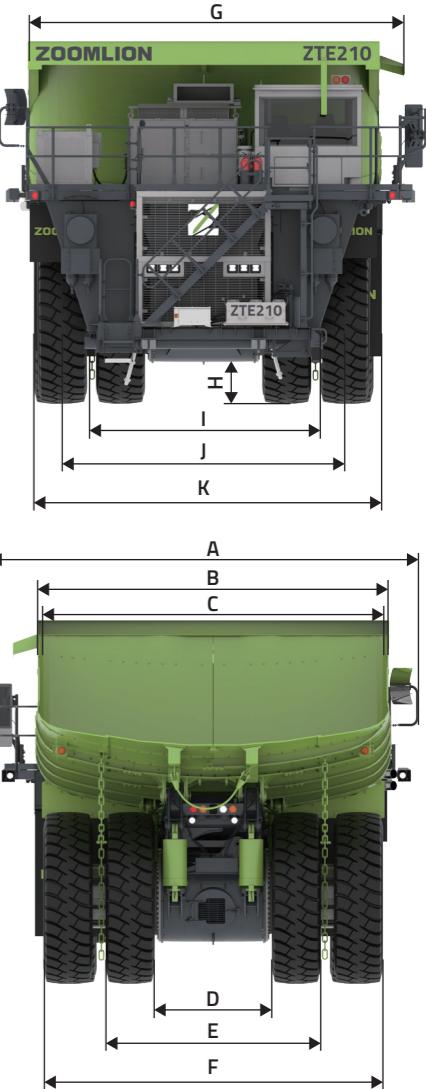

Fuel fillers are distributed on both sides of the frame,  
positioned close to the ground for quick refueling.

# TECHNICAL SPECIFICATIONS

CATEGORY	ITEMS	UNIT	ZTE210
WEIGHT PARAMETERS	Total machine weight	kg	210000
	Rated payload	kg	120000
	Empty machine weight	kg	90000
MASS DISTRIBUTION	Empty	Front axle	kg 45000 (50%)
		Rear axle	kg 45000(50%)
	Loaded	Front axle	kg 69300 (33%)
		Rear axle	kg 140700 (67%)
POWER PARAMETERS	Engine model	/	YC12VTD1450-T300
	Engine rated power	kW/ rpm	1045/1800
	Engine max. torque	Nm/rpm	6105/1300
	Engine displacement	L	39.2
	Emission standard	/	GB 20891-2014
	Drive type	/	4x2
	Tire	/	30.00R51
	Max. speed	km/h	51
DRIVING PARAMETERS	Min. turning diameter	m	24.6
	Max. gradeability	%	24
	Min. ground clearance	mm	570
	Fuel tank	L	1200
MAINTENANCE CAPACITY	Hydraulic tank	L	650
	Cooling system	L	300
	Engine oil	L	215
	Gear oil tank	L	50x2
	Heaped (SAE 2:1)	m <sup>3</sup>	70

PARAMETER DESCRIPTIONS	CODE	ZTE210 (mm)
Overall machine width	A	7100
Outside body width	B	5832
Inside body width	C	5750
Inner front tire width	D	2130
Centerline rear dual tire width	E	3958
Overall tire width	F	5810
Operating width	G	6230
Min. ground clearance	H	725
Inner front tire width	I	3861
Centerline front tire width	J	4691
Front tire width	K	5520
Overall machine height	L	6050
Inside body length	M	7730
Front overhang	N	3770
Wheelbase	O	5000
Rear overhang	P	3295
Overall machine length	Q	12065
Dump height	R	1473
Loading height	S	5300
Overall height – body raised	T	11183
Inside body height	U	2386
Dump angle		45°

SYSTEM	STANDARD EQUIPMENT	ZTE210
POWER SYSTEM	Fuel filter stages	3
	Air filter	●
	Engine independent cooling	●
	Coolant level indicator	●
	Radiator fan guard	●
	Engine oil filter	●
	Removeable powertrain	●
	Engine emergency stop button - ground	●
